## (54) DEVICE AND METHOD FOR ADAPTING DISPLAY ENABLE INFORMATION SIGNAL

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide a web page adaptive system and method for editing display data related to a web site corresponding to a display and window for displaying a home page.

**SOLUTION:** Various display access strategies are provided for a visual device in the wide range such as a standard PC monitor 113a, lap-top screen, perm top, web phone 113d and display of digital camera, and large window to small window, for example. In the new web site design, a mechanism is taken in for automatically displaying the contents of the home page through the easiest method for a user for displaying contents on the screen or the window in the prescribed size. A link is displayed together with any text or picture to become the link destination when it is allowable for the size of display screen or window, for example.

### LEGAL STATUS

[Date of request for examination] 22.12.1999

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3725369

[Date of registration] 30.09.2005

[Number of appeal against examiner's decision]
